### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Werner Sterner on August 3, 2007.

The application has been amended as follows:

Claim 1 has been amended as set forth below:

--1.(Amended)      A reducing agent pump for delivering liquid reducing agent to an exhaust-gas aftertreatment system of an internal combustion engine, comprising;

a cylindrical pump body;

a coil carrier surrounding said pump body and serving to receive an electromagnet;

a piston disposed to execute an axial movement in said pump body when said

[electromagnetic] electromagnet is being energized;

Art Unit: 3746

a pump inlet part and a pump outlet part closing off said pump body at respective ends thereof, each of said inlet part and said outlet part having a central flow passage, at least one of said pump inlet part and said pump outlet part forming a two-piece part having a first element including said central flow passage and a closure element which is fixedly mounted; and

a spring element disposed to bias said first element relative to said closure element and to allow a relative movement between said first element and said closure element when a pressure exceeds a spring force of said spring element.--

The following is an examiner's statement of reasons for allowance: the prior art neither discloses nor makes obvious a reducing agent pump having a piston which moves axially when an electromagnet is energized as claimed including a pump inlet part and a pump outlet part closing off the pump body at respective ends thereof, each of said inlet part and said outlet part having a central flow passage, at least one of said pump inlet part and said pump outlet part forming a two-piece part having a first element including said central flow passage and a closure element which is fixedly mounted; and a spring element disposed to bias said first element relative to said closure element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles G. Freay whose telephone number is 571-272-4827. The examiner can normally be reached on Monday through Friday 8:30 A.M. to 5:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick can be reached on 571-272-4561. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
